

LENG MONYKANDY

Master of Architecture candidate · Urban studies · Street-view imagery & 3D reconstruction

monykandyleng@gmail.com · github.com/X3n0xs · <https://x3n0xs.github.io/>

PROFILE

Architecture and research background focused on reconstructing and analyzing urban environments from 360° / street-view imagery, combining 2D and 3D data for spatial and urban studies.

EDUCATION

Master of Architecture — Southeast University, Nanjing

2024–2027 · Research focus: urban studies with street-view imagery and 3D reconstruction

Bachelor of Arts in Architecture — American University of Phnom Penh

2019–2024

CONFERENCE PRESENTATIONS

3D urban segmentation from street-view imagery

GISA Annual Conference · 2025 · Japan

Facade vulnerability and pedestrian risk zones from street-level imagery

ISOCARP World Planning Congress · 2025 · Saudi Arabia

EXPERIENCE

Imajineer — Intern, Phnom Penh

May–Dec 2023

- 3D modeling and ArchViz support for interactive project visualization
- Assisted visualization workflows using Unreal Engine

SET ART Architect — Intern, Phnom Penh

Jun–Aug 2022

- Produced plans, sections, elevations, and detail drawings in CAD/3D tools
- Supported site surveys and documentation for renovation work

COMPETITIONS

Yearning to Breathe: BIOPHILIA — Participant

2022 · Shortlisted among international entries

Breathe of the City — Team Leader

2024 · Shortlisted local design competition entry

Under the Canopy 2 — Team Leader

2023 · Temporary canopy design and 3D coordination

RESEARCH INTERESTS

Street-view urban analytics · 3D reconstruction from panoramic imagery · Pedestrian exposure and street-level risk reading · Spatial computing for urban studies

SKILLS

Research — street-view / 360° workflows, point clouds, spatial analysis

Design — CAD, 3D modeling, visualization

Languages — Khmer, English
